

REMARKS

The amendments to the application are being made to insert the cross reference to related patent applications which also reflects the national phase status of the application, and to include the Abstract.

Furthermore, claims have been amended to address some clarity objections raised in the Written Opinion with respect to the parent PCT application. For example, claims 6, 7, 10, 14, 16, 25, 26, 39 and 40 have been amended to resolve a lack of antecedent basis by replacing the term "the solvent" with "the molecule". Claim 18 has also been amended to replace the term "the liquid dispersion" with a term "the fluid" which has a proper antecedent basis in the parent claim. Claims 10, 26 and 40 have also been amended to use more proper Markush grouping. Further amendments have been made to claims 3, 16, 17, 21 and 53 to correct typographical or grammatical errors.

It is submitted that all the amendments made herein are to more clearly and succinctly recite the invention and to correct defects in the claims. These amendments are fully supported by the application as originally filed, and therefore no new matter has been added by the amendment.

Respectfully submitted,

Dowell & Dowell, P.C.
